PART 2: Review Comments

	Reviewer's comment	Author's comment (<i>if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here</i>)
Compulsory REVISION comments	In the present paper a series of simple and well known reactions have been carried out on 4-hydroxyquinoline templates for the synthesis of new and interesting heterocyclic derivatives in good yields. The products have been correctly characterized and described. Consequently, I suggest to accept this manuscript as it is for publication in the journal.
