Dear Dr. ZZZ:

The reviewers asked many questions, one reviewer even suggested rejecting the paper. But the authors managed to revise the paper nicely, made its quality much higher. I am glad to see the paper get so much better with the help of our reviewers and editors. As one of the reviewers pointed out, this paper has some limitations (eg. small sample numbers), but it is still an interesting topic, and the authors have pointed the limitations in the paper, so readers can realize this.

My suggestion is to accept this paper.

With best regards.
