**PART 2:**

<b>FINAL EVALUATOR'S comments on revised paper (if any)</b>	<b>Authors' response to final evaluator's comments</b>
The corresponding author has complained of scarcity of the literature on PCOS while I believe not only enough recently published work is available but various books are also written on it. Reviewer s comments are just suggestions for rising manuscript and journal levels.	<b>I did a search for the recent articles on genetics of pcos, after the referee's comments. I do not have easy access to books. However, some of the article I could get for 2009-2011 (review) does not have much to add the existing information.</b>
