SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Compulsory REVISION comments		
Minor REVISION comments	The authors could clarify in the inclusion criteria if patients will be incorporated to the study taking into account the subtypes of schizophrenia.	
Optional/General comments	This protocol is well structured and designed. It includes the study of clinical, biochemical and molecular factors that will allow answering the question of whether folate and B12 supplementation could improve mental and physical health in patients suffering from schizophrenia.
