

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	2013_BJMMR_6435
Title of the Manuscript:	FACTORS THAT INFLUENCE COMPLIANCE WITH ANNUAL IVERMECTIN TREATMENT AND WILLINGNESS OF INDIVIDUALS TO CONTINUE WITH THE TREATMENT IN ABIA STATE, NIGERIA

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The manuscript has been further improved. However there are still a few important revision questions:</p> <ul style="list-style-type: none"> (i) The authors stated in the Data Collection section that "The sample size was determined using sample size determination table by Krejcie and Morgan (15)." They have to include more details about it if they computed sample size. Which are the parameters considered for sample size determination? (ii) In the first paragraph of Statistical Analysis change "determined" by "described". (iii) Exclude "however" from line 154. (iv) In Table 1: substitute 01 by 1. In the column regarding % of compliance consider the same number of decimal places for all numbers. <p>Result from chi-square test (p-value) may not be valid since there are few observations in some cells (zeros). Use Fisher exact test instead. Rewrite sentence.</p>
