

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Medicine and Medical Research
Manuscript Number:	2014_BJMMR_13344
Title of the Manuscript:	Effectiveness of Lumbar Puncture in Elderly Patients Presented with Acute Confusional State
Type of the Article	Short Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The additions to this paper do make it a more useful analysis. Ultimately, though, it is still hard to follow. At this point my hesitancy to recommend publication is based on the presentation of the material as opposed to the content itself. If the authors were able to have someone edit it to make it more easily to follow in English, then it would be acceptable for publication. However in the exact current state I would not recommend publication.</p>
